DETAILED ACTION

1. Applicants amended claims 1, 16 and 31 in the amendment received on 10/30/2003. The pending claims are 1-45.

Allowable Subject Matter

2. **Claims 1-45 are allowed.**

The following is an examiner's statement of reasons for allowance:

The closest available prior arts, USP 5,959,627, issued to Duwaer et al. also teaches a file structure for storing a hierarchically structured content object capable of being produced by a processing system and having a plurality of content entities to facilitate content adjustment. However, as in claim 1, Duwaer fails to teach or suggest *an identifier file object containing a list of content entity identifiers defining the content of the content object, wherein the arrangement of the content entity identifiers within the list corresponds to a content object hierarchical structure including at least one hierarchical tier and at least one subordinate tier, and wherein the content entity identifiers are determined by the processing system and placed in the list in response to user selection of content entities for the content object*. As in claims 8 and 38, Duwaer fails to teach or suggest *an identifier file object containing an outline of containers and content entity identifiers defining the content and corresponding to a hierarchical structure of the content object, wherein each container represents a hierarchical structure tier and includes at least one content entity identifier forming a subordinate hierarchical tier, and the content entity identifiers are*

determined by the processing system and placed in the outline in response to user selection of content entities for the content object. As in claims 16 and 31, Duwaer fails to teach or suggest the step of *storing a list of content entity identifier defining the content of the work within an identifier file object, wherein the arrangement of the content entity identifiers within the list corresponds to a work hierarchical structure including a least one hierarchical tier and at least one subordinate tier, and wherein the content entity identifiers are determined by the processing system and placed in the list in response to user selection of content entities for the work.* As in claim 23, Duwaer fails to teach or suggest the step of *storing an outline of containers and content entity identifiers defining the content and corresponding to a hierarchical structure of the work within an identifier file object, wherein each container represents a hierarchical structure tier and includes at least one content entity identifier forming a subordinate hierarchical tier, and wherein the content entity identifiers are determined by the processing system and placed in the outline in response to user selection of content entities for the work.* Therefore, the invention is allowable over the prior arts for being directed to a combination of claimed elements including the providing steps as indicated above.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
